

Ring Sizer

Instructions:

- Print the ring sizer and trim with scissors. Make a small slit where the diagram is marked with an arrow.
- Place the ring sizer comfortably around the finger you want to measure by slipping the pointed end through the slit with the numbers facing out.
- Secure the ring sizer by pulling the pointed end snugly around your finger like a belt, just tight enough so you can still move it around. Be sure it's not too tight or too loose.
- Your approximate ring size should be the number that appears where it says 'Read Size Here'.

You can also measure your finger by wrapping a string around it. Measure the length of the string that makes exactly one loop around, and use the chart below for reference.

If the finger you wish to measure is not available for measuring (ie a surprise gift), you can get an approximate size by using a ring from the individual's current jewelry collection. Place the ring on a circle within the chart below. The correct circle size should fit right against the inside edge of the ring.
